BSH-TR FLCI has been using ProVIEW-ProMANAGE Production Management System since 2006. The system supports our TPM, Lost cost analysis, OEE performances, 6_Sigma activities projects via collected data and detailed reporting tools to recognize losses, reasons FLCI has become a candidate to TPM award of JIPM at the middle of 2006 and OEE, Breakdown, Tool changeover times, Cycle time followed on it four year period and the system tools presented to Japanies auditor of JIPM. System has wonderfull OEE analyzing tools to understand and develop the loses easily. By using Proview-ProMANAGE system our plant OEE has %5 increased in six month. After in the 3 year OEE has 15-18% increased, Breakdown decreased %20, tool changeover times have decreased between 20-30 % also with SMED activities.

The system has been installed in two months easily. Operators can easily use the KeyPDT terminals only choosing, entering some variables.

All the projects need the some measures, ProVIEW-ProMANAGE production Management System is enough for all Production Performance loses. Some new software and hardware additions brings new ideas and visions to the plant responsibler to extend effectiveness and the way of doing production for the operators.
